

Smart In-Wall Outlet PRO

Description:

The ConnectSense Smart In-Wall Outlet PRO is an advanced smart outlet. It is designed for both consumer and commercial-grade applications. Available in both 15A and 20A options, the In-Wall Smart Outlet is easy to install by a certified electrician and can be provisioned quickly to an available wireless network.

The Smart In-Wall Outlet allows for complete control and monitoring of any device that is plugged into the Outlet. The Outlet's relays can be used to turn on/off each individual outlet through the available app, voice commands, or using its capacitive touch feature. With plug detection, the In-Wall Smart Outlet can detect when a device is plugged into each outlet. The various networking options provide the user with different wireless technology options to choose from depending on the type of network being used.

ConnectSense has designed a local application program interface (API) for the In-Wall Smart Outlet, which includes a rich set of commands.

Features:

- Dual on/off relay controls
- 125V/20A commercial rating
- Precise power monitoring
- Plug detection for safety
- Pairing using NFC technology
- Wiring screws
- Easy setup and configuration
- UL/cUL/FCC
- Capacitive touch
- Dimmable LEDs
- Local API
- Power Monitoring (Current, Historical)
- Scheduling
- Rule Creation via integrations
- Pass-through for hot and neutral lines

Works With:

- Control4
- Apple HomeKit
- Amazon Alexa
- Google Assistant
- iOS & Android compatible app
